DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-5, 7-19, are drawn to a purified nucleic acid, classified in class 536, subclass 23.1.
- II. Claims 6 and 27, are drawn to an isolated polypeptide and functional fragments classified in class 530, subclass 350.
- III. Claims 20-24, are drawn to a method of producing a Rrn3 polypeptide, classified in class 435, subclass 70.1.
- IV. Claims 25 and 26, are drawn to an antibody, classified in class 530, subclass 387.1.
- V. Claims 28-34, are drawn to a method of identifying agonist and antagonists, classified in class 435, subclass 7.1.
- VI. Claims 35-38, are drawn to a method of screening for hypoproliferative or hyperproliferative disease, classified in class 435, subclass 6.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I, II, and IV are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions differ because the groups are drawn to

Art Unit: 1642

patentable distinct subject matter. The inventions are structurally and functionally different and are used for different purposes.

3. Inventions III, V and VI are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions differ from one another because they are drawn to patentable distinct subject matter. The methods of the instant invention are used for different purposes and have different outcomes that have different determinations.

4. Inventions I, II, IV and III, V, VI are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case the products can be used for different purposes, such as in diagnosis, analytical, and therapeutics.

5. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

6. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Art Unit: 1642

7. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
